## CONTENTS

### Section I - General Information

### Section II - Points of Contact

### Section III - Pricing

### Section IV - Technical Requirements – Specifications

### Section V - Warranty Provisions

.....

## Section I – General Information

**1. Purpose:** This contract was established for the acquisition of telephones and accessories on an as needed, if needed basis for various agencies located throughout the State of Missouri.

**2. Contract Periods/Renewals:** The initial contract period is August 21, 2003 through August 20, 2004. The contract includes two (2) additional one-year periods, or any portions thereof.

### **3. Equipment:**

- a) The contractor shall provide new telephones with new accessories, which meet or exceed the specifications contained in this document.
- b) The contractor shall provide any additional equipment necessary, at no cost to the state, if awarded equipment is defective or otherwise fails to meet the specifications outlined in this document. The State of Missouri shall determine whether the specifications are adequately met.
- c) The contractor shall not substitute any item(s) that has been awarded to the contractor without the prior written approval of the Division of Purchasing and Materials Management.
- d) The state reserves the right to allow the contractor to substitute any new equipment offered by the contractor on all unshipped and future orders if the equipment capabilities are equal to or greater than the contract equipment and if the prices are equal to or less than the contract equipment. The Division of Purchasing and Materials Management shall be the final authority as to acceptability.
- e) In event of manufacturer discontinuation, the contractor shall substitute item(s) with equal or better capabilities for equal or less cost than the discontinued item(s). The contractor shall not substitute any item(s) without the prior written approval of the Division of Purchasing and Materials Management. The Division of Purchasing and Materials Management shall be the final authority as to acceptability of requested substitutions and reserves the right to accept or reject any substitution requests.

- f) All price reductions offered by the manufacturer or dealer during the contract period shall be passed along by the contractor to the Division of Purchasing and Materials Management. Such notice should be given within ten days after issuance. The lower prices shall apply on all unshipped orders from the date of price reduction.

#### **4. Support:**

- a) The contractor should deliver equipment not later than 15 days after receipt of an agency order.
- b) The contractor shall provide installation assistance (e.g. telephone support) and documentation, if requested by the state agency.
- c) The contractor shall provide installation assistance (e.g. telephone support) and documentation, if requested by the state agency. Basic documentation is included with most of the equipment included in this offering. Additional documentation can often be purchased from the manufacturer at additional cost. Sprint will also utilize the resources of the manufacturer and distributor to provide phone support.
- d) The contractor shall provide all training required (e.g. telephone support) for successful operation of the equipment and installation, including manuals for staff designated for training. Manuals shall include pictures and diagrams of the unit, its features and operation. Troubleshooting and remedy information should also be included. Basic documentation is included with most of the equipment included in this offering. Additional documentation can often be purchased from the manufacturer at additional cost. Sprint will also utilize the resources of the manufacturer and distributor to provide phone support.
- e) The contract shall replace any defective equipment provided under contract and still under warranty at no additional cost to the State of Missouri including all shipping costs for returning non-functional items to the manufacturer for replacement. This provides shall extend to any item received in damaged condition.
- f) The contractor should provide the means for repair of any defective equipment, which is not under warranty. Out of warranty repair, when available, is performed by the manufacturer. Sprint will provide the appropriate contact information to agencies requesting this type of repair.
- g) The contractor shall provide equipment support during regular business hours. Support shall include provision of upgrades and new releases as well as technical support for all equipment provided, including ongoing telephone support, problem determination, and resolution.
- h) The contractor shall supply the user documentation/operating manuals necessary to install, operate and maintain the products provided. These manuals shall include pictures and diagrams of the unit, its features and operation. Troubleshooting and remedy information shall also be included. User's Manuals are shipped with each telephone purchased. Additionally, each of the manufacturers listed in our response maintains a web site with product information.

## Category 2 - Digital Centrex Business Sets:

### General Overview of Digital Centrex Business Sets:

- The M5000-Series of Meridian Business Sets is a comprehensive line of featured voice and data terminals. ISDN Meridian Business Sets use a Type C line card (NT6X21) at the central office or remote. Business Sets use an out-of-band signaling channel to communicate with the switch and enable the operation of feature-access keys and display features.
- Meridian Business Sets are single-line phones with multi-line functionality. Designed to work with Meridian Digital Centrex (MDC) service, every MBS II Portfolio set provides fast, convenient access to the Centrex and CMS/CLASS features..
- Programmable keys allow additional line appearances or button access to features such as Call Forwarding or Call Pick-Up. And Multiple Appearance Directory Number (MADN) provides simultaneous support for incoming and outgoing calls from the same set.
- Users can pick up calls on multiple directory numbers and even use one of the secondary lines to make outgoing calls.

### Applications:

- Meridian Business Set without Display (M5008) - for low-volume calling applications that don't require a display.
- Meridian Business Set with Display (M5208) - a match for any Centrex arrangements or for other applications involving occasional call coverage by a receptionist.
- Meridian Business Set with Display and Headset Capability (M5216) - recommended for central-answering position, call-center, or other high-volume applications, such as automatic call distribution (ACD).
- Meridian Business Set with Display and Handsfree Capability (M5316)
- Meridian Mate Expansion Module (M522) - one or two 22-button expansion modules added to an M5216 or M5316 can create a miniconsole providing up to 44 extra programmable buttons.

**Meridian Business Sets include the latest display technology:** The tiltable, 2-line X 24-character liquid crystal display (LCD) is wider than usual - ideal for displaying information about features or calls, including Calling Name and Number. The LCD can automatically display additional information about a call, such as the name and number of a forwarding party.

- **Power feature** - users can press a key to add, delete, and change certain MDC features on their own set as well as others' sets.
- **Inspect key** - gives users information about incoming calls and about the features assigned to their sets.
- **Programming key** - users can set up features, such as the date and time, and the call-timer.
- **High-Performance Standard Features** - Designed with ergonomics in mind, all sets in the MBS II Portfolio have a larger key pad to make dialing faster and more convenient. The volume control bar is enlarged to make it easier to adjust the speaker, ringer, or handset.
- **Wall mountable:** Every set includes an integrated kit for optional wall mounting.

## Capabilities:

- **Visual Ringing indicator** - alerts you visually to an incoming call (helpful if you're on another call or have the ringer volume turned down).
- **LCD indicators** - shows if a feature is activated, or if a line is idle, ringing, or on hold.
- **Visual Message Waiting indicator** - works with a message center application or voice mail to let you know when you have messages.
- **Hold button** - puts calls on hold (the set automatically places an active call on hold if you answer another incoming call or are getting ready to make another call).
- **Release button** - lets you end a call without replacing the handset in the cradle (convenient when you are transferring a call).
- **Built-in speaker** - allows dialing without lifting the handset (helpful for establishing calls or checking voice mail).
- **Primary directory number** - this key accesses your main telephone line or extension number (automatically selected when you lift the handset).
- **Loop powered sets** - Because they require no local power, the M5008 and M5208 sets retain display functionality even during a power outage.
- **Enhanced speakerphone** - The M5316 set offers third-generation, handsfree capability for more natural conversation flow. A built-in microphone lets you hold a two-way conversation without lifting the handset.
- **Headset jack** - Equipped for headset use, the M5216 is recommended for ACD or central answering position applications.

### ITEM 004 - M5008 Meridian Set Highlights:

- Enlarged buttons on the keypad make dialing easy and quick.
- Eight line/feature keys let you configure the M5008 to suit your requirements.
- Loop powering assures the Feature/Line Indicators display always works, even during power outages.
- Eight programmable line/feature keys plus color-coded Hold and Release keys improves efficiency and call processing.
- Built-in speaker permits on-hook dialing and easy voice-mail access.
- Integrated Wall Mount kit lets you install the set on the wall.

### ITEM 005 - M5208 Meridian Set Highlights:

- MADN-capable, you can program your set to display other users' directory numbers.
- Two-line X 24-character LCD tells you who is calling and whether the call was transferred or forwarded.
- Flashing lamp provides visual ringing indication for incoming calls.
- Eight programmable line/feature keys plus color-coded Hold and Release keys.
- Built-in speaker permits on-hook dialing and easy voice-mail access.
- Loop powering retains display capabilities even during a power outage.

**ITEM 006 - M5216 Meridian Set Highlights:**

- Headset compatible.
- In-Calls key lets an agent using the headset answer the next incoming call automatically, and hang up by simply pressing the Release key.
- The 2-line x 24-character LCD can deliver call information such as call progress, queue status, and calling name and number.
- Fourteen programmable line/feature keys let you assign additional directory numbers or special ACD features.
- Supports two M522 Meridian Mate units, allowing modular expansion.

**ITEM 007 - M5316 Meridian Set Highlights:**

- Handsfree operation and Mute Key lets you do other tasks or talk confidentially with someone in the room while you conduct a conference call.
- Thirteen programmable line/feature keys let you customize local features on your set, such as time and date.
- One-button access to your most used MDC features; built-in call timer for easy call monitoring; built-in speaker for convenient on-hook dialing and easy voice-mail access.
- Two-line x 24-character LCD for easy access to call information, including date and time.

**ITEM 008 - Meridian Mate (M522) Highlights:**

- Offers effective miniconsole capabilities with up to 44 additional programmable buttons
- Compatible with M5216 and M5316
- Associated LCD indicators and additional keys for lines or features
- In conjunction with Direct Station Select (DSS), an attendant can monitor and select a free station by touching a button.
- Busy Lamp Field (BLF) feature allows the attendant to visually monitor the agent who is available to take a call.
- Camp-on allows attendant to transfer a call to a busy station (caller is placed on hold until station is available).

**NOTE:** These models are available in colors black, ash, or gray.

**Category 3 - Headsets:****ITEM 011 - Plantronics M12 Vista Universal Amplifier for Plantronics Headsets (Base Only):**

- Vista Universal Amplifiers connect Plantronics headsets to just about any modular single- or multi-line phone\* and offer ergonomically designed volume, headset/handset, and mute controls. With its easy-to-use one-button selection of headset or handset, Vista amplifiers deliver precise levels of listening and talking comfort, superior protection, and excellent audio performance to your office telephone.
- \*Will not work with dial-in-handset or cordless telephones.
- Easy to Install and Use. Vista Universal Amplifiers adapt almost all telephones for use with a wide range of Plantronics headset styles. Easy One-Button Controls. Select between your headset and handset at the touch of a button. Separate controls allow independent adjustment of outgoing and incoming volume. SoundGuard®Plus™ delivers automatic sound protection by keeping incoming sounds at comfortable hearing levels.

### **ITEM 012 - Plantronics Headset Switcher Multimedia Amplifier MX10 (Base Only):**

- The Plantronics Headset Switcher Multimedia Amplifier enables advanced desktop applications, increasing the productivity of headset users. Speech Recognition provides many computer users a preferred option to using the keyboard and mouse. With speech recognition software installed, users interface directly with the computer, simply by speaking into the microphone of a Plantronics headset.
  - Reduces the risk of repetitive stress injuries.
  - Increases productivity for slow typists.
  - Create and updates customer / patient records,
  - Reduces transcription errors, delays and costs by dictating documents.
  - Makes computers accessible to disabled employees.
- Single Headset with Telephone and Audio Device. Convenient use of both the telephone and audio device, using the same high-quality Plantronics headset. Easy to Install. Adapts almost all telephones for use with a variety of Plantronics headset styles.
- Easy Audio Compatibility. Compatible with most audio devices, e.g., computer soundcard, voice / fax modem, CD player or tape recorder / player. (Eight-foot audio device cable with 3.5mm plugs for microphone and headphone connection included.)
- Easy to Operate. Simple button controls for headset / handset selection and telephone / audio selection.
- Easy to Adjust. Separate controls allow independent adjustment of outgoing and incoming volume for the telephone, and incoming volume for the audio device.
- Easy to Hear and Be Heard. Call Clarity™ technology sets a new standard for sound quality.
- Easy on the Ears. SoundGuard®Plus™ delivers automatic sound protection by keeping incoming sounds at comfortable hearing levels.

### **ITEM 013 - Plantronics H81 Tri-Star Monaural Headset (Top Only)**

- The TriStar headset offers premium sound quality and combines light weight and small size with a unique design to provide optimum over-the-ear fit.
- With its simple design, replacing the voice tube or earpiece is quick, cost-effective, and takes only seconds.
- TriStar headsets are ideal for executives, call centers, and help desks, as well as technical helplines.
- Comfort and Stability. The Three-Point Fit. With four sizes of user-selectable earbuds and an adjustable receiver arm, the TriStar headset can be custom fitted to just about anyone. Weighing under one-half ounce, TriStar is a pleasure to wear.
- TriStar headset wearers can easily multitask as they talk on the phone. If it becomes necessary for wearers to leave their desks, they can simply use the Quick Disconnect™ feature without removing the headset, and the other party stays on the line.
- The ultimate over-the-ear design: the TriStar headset give you all-day comfort plus unshakeable three-point stability.
  - Innovative three-point design for stability—support behind, on top of, and on the ear
  - Four user-selectable earbud sizes and adjustable receiver arm for a precise fit
  - Exceptionally lightweight (0.42 oz/12g)
  - Can be worn on either ear
  - Clear, adjustable voice tube

- Supports SoundGuard Plus and Call Clarity technologies for superior sound
- 10' cable with Quick Disconnect feature
- Adjustable clothing clip

#### **ITEM 014 - Plantronics H81N Tri-Star (Noise Canceling) Monaural Headset (Top Only)**

- The TriStar headset offers premium sound quality and combines light weight and small size with a unique design to provide optimum over-the-ear fit.
- With its simple design, replacing the voice tube or earpiece is quick, cost-effective, and takes only seconds.
- TriStar headsets are ideal for executives, call centers, and help desks, as well as technical helplines.
- Comfort and Stability. The Three-Point Fit. With four sizes of user-selectable earbuds and an adjustable receiver arm, the TriStar headset can be custom fitted to just about anyone. Weighing under one-half ounce, TriStar is a pleasure to wear.
- TriStar headset wearers can easily multitask as they talk on the phone. If it becomes necessary for wearers to leave their desks, they can simply use the Quick Disconnect™ feature without removing the headset, and the other party stays on the line.

### **ITEM 037 - Ultratec Superprint Pro80 TTY:**

- Combining the comfort of a full-size computer keyboard and 80-column printer with state-of-the-art technology, the Superprint Pro80 lets you do it all.
- TTY users can take advantage of Caller ID without buying additional equipment! The Superprint Pro80 has it built in. If your telephone service includes Caller ID, your Superprint Pro80 can tell you who is calling before you even answer.
- This top-of-the-line TTY includes the most advanced capabilities, giving you more choices than ever! It features direct connect with two, built-in telephone jacks and advanced calling features like auto-busy redial and three-way calling. Call progress tells you if the phone number you are calling is ringing or busy. Auto-Answer takes messages for you when you are unavailable.
- The 32k memory lets you save hundreds of telephone numbers and memos by name. You can personalize greeting messages, memos and outgoing Auto-Answer memos. Convenient arrow keys make it easy to review information saved in memory.

- Turbo Code lets you control the speed of your conversations and enjoy real-time communication with other Turbo Code TTYs. It also lets you interrupt one another. Smart features designed for your convenience are included. The TTY Announcer lets hearing people know you are on the line by voicing TTY call, please use text telephone. The User-programmable Relay Voice Announcer tells hearing callers to use a TTY or call using relay, and gives the phone number for your relay service. Auto ID lets everyone you call know that you are using a TTY.

## **KEYBOARD**

- Turbo Code® User-programmable Relay Voice Announcer
- Built-in ring flasher

#### **ITEM 039 - Walker W10 - In Line Telephone Handset Receiver Amplifiers**

Walker W10 - In Line Telephone Handset Receiver Amplifiers are an AC-powered in-line receiver amplifier for your home or office desk telephone. The W10 allows the user to amplify the receiver volume 3 times higher than normal (up to 20dB) using their current unamplified handset.

The W10 easily installs between the existing telephone base and the current handset, and improves listening volume up to 20 dB for clearer reception. It uses a rotary (thumb wheel) volume control to adjust to individual hearing needs. Includes a AC power supply. Portable for travel and is compatible with electronic or standard phones. (*The dial pad must be in the base of the phone.*) Perfect for the hearing impaired.

The W10 series boost the receiver volume over three times the normal level, making hard-to-hear calls easier to hear.

Amplifier Gain: + 24dB

Frequency Response: Flat within +/- 5dB from 300 Hz to 3000Hz

Available colors: Ash, Black, Ivory or Pearl
